As a cancer patient, I have a wonderful medical team of specialists, but I credit Dr. Robert with saving my life. He was the one who recommended a simple ultrasound to determine why I was having serious issues and found the tumor that was causing the problems.

Donna and Roxie kicked into high gear with followup to get me to surgeons and into the hospital in record time. The Me'Chosen team have monitored my progress and gone above and beyond to help me in my recovery.

The office is run efficiently, wait times are minimal, and the team shows great kindness and compassion. I also highly recommend you go early so you can enjoy the spectacular setting as part of your appointment. It's very therapeutic!
